- 1. (Currently Amended) An isolated polynucleotide comprising:
 - (a) a first nucleic acid encoding a light-generating gene product[[;]] operably linked to a cis-acting angiopoietin-2 (Ang-2) regulatory element, wherein said cis-acting Ang-2 regulatory element comprises the amino acid sequence set forth in SEQ ID NO: 1; and

(b) a second nucleic acid encoding a selectable marker, wherein said selectable marker is operably linked to a promoter, and wherein expression of said selectable marker allows for selection of said polynucleotide in a eukaryotic host[[; and]]

(c) a cis-acting Ang-2 regulatory element.
